PROFILE

Full stack engineer and founder of Codorah. I architect and build web, mobile and SaaS applications end to end: React/Next.js front ends, APIs and databases, Mobile Money payment integration, AI model integration (LLMs, computer vision) and production deployment. Focused on mobile-first, offline-first products for West Africa. 15+ products shipped.

EXPERIENCE

Full Stack Engineer · SAYGOO — 2026 - present

- Technical architecture and backend development (APIs, data modelling) for a logistics and customs SaaS platform serving West Africa.
- Business data integration, reliability and maintainability of the platform in production.

Founder and Tech Lead · Codorah — 2025 - present

- End-to-end delivery of client projects: scoping, architecture, web and mobile development, CI/CD and deployment (Vercel, Render).
- Integration of generative AI (Claude, Gemini) and computer vision (YOLO, OpenCV) into business products.
- Startup supported by Anthropic's Claude for Startups programme. Ad videos and motion design for product launches.
- IT and AI consulting: needs analysis, recommendations, roadmap, then team training (generative AI, prompt engineering).

Executive Assistant and Trainer · Freelance

- Coaching on AI tools, no-code and project planning.

PROJECTS

eganyé eganye.codorah.com
Digital savings-circle fintech: Mobile Money payment integration (Flooz, Mixx), wallet and withdrawals, member scoring and an AI reminder assistant.
React · Vite · Supabase · PWA

Smart Pressing see it live
Offline-first Android app: YOLO object detection for garment intake, order tracking, WhatsApp notifications.
Android · YOLO · Local storage

HEST hest-edu.net
School website: BTS, Bachelor and Master programme catalogue, online enrolment.
React · Tailwind CSS

EduFast Academy edufast.academy
Mobile-first freemium EdTech platform: gamified learning paths, a generative AI mascot, multi-role spaces (schools, teachers, parents).
Generative AI · Gamification · Mobile-first

TechLingo see it live
Offline-first PWA for workplace English: gamified paths by profession and interview simulation.
React · PWA · IndexedDB

EcoScan Africa see the project
Computer-vision waste classification and B2B dashboards for municipalities. Presented at One Young World.
Python · YOLO · OpenCV

EDUCATION

Bachelor's in Software Engineering · HEST, Lomé — 2023 - 2026

Bachelor's in Economics · University of Lomé — 2023 - 2025

SKILLS

Languages
TypeScript, JavaScript, Python, Dart, PHP, SQL

Front end and mobile
React, Next.js, Tailwind CSS, Flutter, PWA

Back end and data
Node.js, FastAPI, Django, REST APIs, PostgreSQL, MySQL, Supabase, Firebase, Prisma

AI
LLMs (Claude, Gemini), prompt engineering, YOLO, OpenCV

Cloud and tools
Git, GitHub, Vercel, Render, Azure

Project management
Agile / Scrum, Jira, Notion, Trello

SERVICES

Web, mobile, SaaS, AI integration, Mobile Money payments, video and motion design, IT and AI consulting, AI training.

AWARDS

- **Togo EdTech incubation programme** 2026: EduFast among the 9 startups selected from 39 (immersion in Vienna, eLearning Africa in Accra)
- **Claude for Startups**, Anthropic
- **UNESCO Youth Hackathon** 2026
- **One Young World**, Cape Town
